Dear Prof. Wenny Rahayu,

I would like to thank you very much for your willingness to be a World Class Professor in our submission. The requirement should be provided for the submission are

1. your curriculum vitae
2. your commitment letter as WCP,
3. and supporting letter from the head of your institution, to state about you participation in this program and to proof the affiliation with a university / research institution / industry

Commitment letter consisted of below information:

- 1) State the willingness to come with a clear visit period
- 2) Agree to include the name as a co-author in the Joint Joint Publication / patent / international monumental work
- 3) Mentioning the title (tentative) for Joint Publication / patent / monumental work
- 4) Target journal names with minimum Q2 reputation
- 5) Write down the names of the authors involved in the Joint international publications / patents / monumental works as a proposal.
- 6) Stating that they have prepared a Joint Publication Draft / patent / work monumental international with author and co-authors.
- 7) Declare (if necessary) additional research activities to perfect the Joint Publication / patent / monumental work international.
- 8) Able to submit Joint Publications / patents / monumental works internationally and follow the development of Joint Publications to Under Review, patents until registered or international monumental works at the end of WCP activities at Institut Teknologi Sepuluh Nopember as proposer university
- 9) Willing to open research facilities for the research staff of the relevant proposer university to conduct research.

With this email I attached draft of joint publication that will be submit to Taylor and Francis (Scimago JR = Q1 H Index 40, SJR 0.74, scopus citesscore = 1.42 Q2) as one of the output of this

Dear Dr Yuhana,

Thank you for sending the information for this submission.
I will send my CV after this weekend, together with the supporting letters.

I am certainly happy to work together on the paper, Do you have a deadline for this paper? I am currently rather busy so if it is ok I will get back to you with my feedback within the next 2 weeks or so.

Best Regards,
Wenny

ABSTRACT

An adaptive assessment system often used to measure the ability of the student. The adaptive assessment system can select suitable questions for each student. Unfortunately, the difficulty level of questions in the current adaptive assessment systems is defined generally and unspecified to assess the competencies. Therefore, the difficulty level of the questions, the initial ability level of the student, and the selected items should be defined adaptively based on the student's context. The content in this research characterizes the situation of student and question, such as the ability level of the student, the scored competency, and the difficulty level of question. The model for context-based item selection is designed to select the question based on the student's ability level, the tested competency, and the difficulty level of question. Test item consisted of ten questions is build to assess the student. The questions are dependent on the student's context, a different student will get different questions. The model for measuring the competency achievement has been proposed and success to define the student's competencies achievement.

1. Introduction

Recently, most education systems utilized a competency-based curriculum Griffith and Lim (2014). In Indonesia, around 149,435 elementary schools implemented this type of curriculum on 2019/2020 academic year Kerdibidhal (2020). It is essential to prepare the suitable tool for assessing the achievement of competency. The aim of the competency-based assessment system is to assess how precisely the achievement of the student's competency.

Assessment is an evaluation process to evaluate knowledge, understanding, and skill's achievement of the learner Authority (2009). Assessment plays a vital role in achieving educational excellence Kennedy and Lee (2006). In East Asia, learning outcomes of each aspect of each aspect as the ability of the student (2003). All of the objectives of the assessment are to measure the student's knowledge, and skills aspects represent of Indonesia and Lee (2016a). According to subsection 3 in this ministerial regulation about assessment principles, one of the laws of assessment of learning outcomes is a reference to criteria,

Abstract. The main factor in learning process is the availability of appropriate learning media. The inappropriate learning media will cause ineffective learning process. This is caused by the material that cannot be delivered to students well. The spreading of coronavirus causes a big challenge in the learning process. The Covid-19 pandemic force social distancing that cause many school and institution closure. During the Covid-19 pandemic, education has changed dramatically. This research is to map the evolution of learning media. This aims to analyze the trend in learning media today. The result shows that based on the technology used to develop learning media can be classified as web-based application, virtual reality, cloud mobile learning, and cross media framework. Based on the technique used to deliver the learning material, it can be classified as content-based learning and activity-based learning. Both technology and technique have their own advantage and disadvantage. This paper will help educators to analyze and decide the right learning media that can be used in the learning process especially in this current pandemic situation.

Keywords: Learning media, content-based learning, activity-based learning, systematic mapping study.

1 Introduction

Learning media is important factor in the process of learning. The inappropriate learning media will cause ineffective learning process. This is also caused by the material that cannot be delivered to students well. Microsoft Power Point presentation become the most popular tools that is used to convey the material. Not only Microsoft Power Point, the rapidly increasing of Information, Communication, and Technology, cause many innovative learning media
